

WINTERCROFT

# Bull Mask

Designed by Steve Wintercroft

## Materials required

- ☐ Access to a printer and 19 sheets of A4 paper or US Letter paper.
- ☐ Thin card, the type used in cereal boxes is ideal. Thicker card like corrugated card will not bend to the detailed folds. The approximate area of flat card that you need is around 5 large cereal box or around 5 sheets of A3 card.
- ☐ Spray mount, Pritt stick, PVA or something that will stick paper to card.
- ☐ Scissors or a craft knife.
- ☐ Straight forward sticky tape, you can use basic cheap tape but I've found that Scotch Magic invisible tape gives a neater finish.
- ☐ Some spare time – approximately 4 to 6 hours.

## Printing instructions

- ☐ The templates are 1:1 scale and are intended to be printed at ACTUAL SIZE on either A4 paper (210mm X 297mm) or US Letter paper (8½" X 11"). In your printer setting please select the type of paper that you are printing on but DO NOT SCALE THE TEMPLATES TO FIT THE PAPER.
- ☐ I have included a 150mm line on the first page of the templates so that you can check the scale. The line should measure 150mm after printing but plus or minus 2mm is acceptable. There is more information on printing the templates in our FAQ section of the website.

## WINTERCROFT

### Instructions for assembly

#### Cutting and Folding

1. Having printed the templates on paper, trim them roughly to the approximate size, they don't have to be neat. Trimming off the excess paper makes it easier to arrange the templates on the card.
2. Unfold your boxes so that you have flat sheets of card to work with, then glue the templates to the card. When you assemble your mask your templates will be on the inside faces of the mask. First choice for gluing the templates would be Spray Mount. It's available from most art shops but can be expensive. A glue stick is a cheaper alternative and also works really well.
3. Cut out the templates along the solid outlines. Cut the solid outlines only, not the dashes.
4. The fold lines on the templates are marked as either a dashed line representing a valley fold or dashes with dots to represent a mountain fold. This is with the templates on the inside of the mask.
5. Score all of the folds marked on templates with either a blunt knife or scissors. Score and fold all of your parts.

Dashed line represents  
a valley fold.

Dashed line with dots  
represents a mountain fold.

## Assembly

6. Start by assembling the horns using the parts on pages 5-8. Start with any edge and find the neighbouring part with matching numbers. Tape together the edges with corresponding numbers for example number 27 joins to number 27. Taping on the outside makes things easier for most parts but if you come to a part that is difficult to tape outside, try taping inside the mask. If a join feels like it is under stress, tape it inside and out to reinforce it. Having built the horns set them aside and assemble the rest of the head using the same technique. Start with the nose part on page 4 and work back from there.
7. Once you have built the head, add the horns by matching the numbers in the same way. Then make the head band following the instructions on the final page and tape it to the inside of the mask. You might need to adjust the band forward or back to get the best fit.
8. You can paint or decorate your mask in any way that you like. Have a look at our website or facebook page for inspiration.

If you run in to any problems or have any questions please check the frequently asked questions on:

## Scale Guideline

To check the scale is correct, the line below should be 150mm from end to end.

# Head Band

To ensure the completed mask fits well you can make a head band and fit it inside of the mask.

## Instructions for assembly

1. Cut two strips of card to roughly the dimensions below and the tape one end together.
2. Then wrap the band around your head and tape the other end to get a good fit. The band should be snug but not tight.
3. Take the band off your head and tape the tabs to the inside of the mask.
4. You might need to move the tabs around a little until you get it fitting right.

NOT TO SCALE

400mm

Cut two pieces of card at these dimensions

60mm

35mm
