

WINTERCROFT

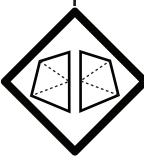

# Dragon Claws

Designed by Steve Wintercroft

These gloves can be built by simply taping the edges together or by using the tabs to glue the edges together.

## Choose

### Untabbed Construction

Choose this construction technique if you are short of time, or are looking for a quick and easy project. Building these gloves without tabs is much quicker and although the finished gloves will still look awesome it will not be as neat.

**Build time approx: 2-3 hours**

### Tabbed Construction

Choose this construction technique if you have plenty of time, are looking for a more substantial project and want to achieve the best possible finish. Building these gloves using tabs will take longer but the finished gloves are stronger and will look neater.

**Building time approx: 4 hours**

## WINTERCROFT

### Materials Required

- Access to a printer and 29 sheets of A4 paper or US Letter paper.
- Thin card, the type used in cereal boxes is ideal. Thicker card, such as corrugated card, does not work well as it will not bend to the detailed folds. The approximate area required is around 11 sheets of flat A3 card.
- Spray mount, Pritt Stick, PVA or similar product that will stick paper to card.
- Scissors and a craft knife.
- 16 Split pin paper fasteners.

### For Untabbed Construction

- Straight forward sticky tape, you can use basic cheap tape but I've found that Scotch Magic invisible tape gives a neater finish.

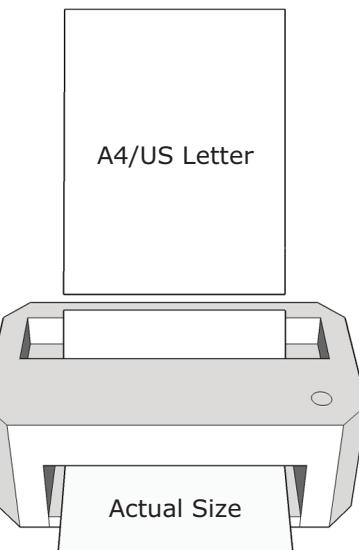

### For Tabbed Construction

- A fast setting adhesive for gluing the tabs and assembling the gloves. You want to use a glue with a fast curing time so that you don't have to wait for parts to dry before continuing. PVA glue works ok but I use a glue stick (Pritt Stick) as this is quick, clean and convenient. A high quality double sided tape is also a good alternative. As you will be putting the gloves on your hands don't use a solvent based glue that could give off harmful fumes.

### Printing Advice

- The templates are 1:1 scale and are intended to be printed at ACTUAL SIZE on either A4 paper (210mm X 297mm) or US Letter paper (8½" X 11"). In your printer setting please select the type of paper that you are printing on but DO NOT SCALE THE TEMPLATES TO FIT THE PAPER.
- I have included a Scale Guideline on the first page of the templates so that you can check the scale. The line should measure 150mm after printing but plus or minus 2mm is acceptable. There is more information on printing the templates in our FAQ section of the website.
- **Please check that your print out contains all of the fold lines that are shown on the PDF.** If not please update your PDF reader to the latest version of Adobe Reader (free) and reprint. This will correct the problem.

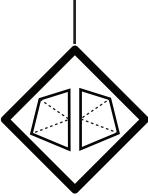

## WINTERCROFT

- Having printed the templates on paper, trim them roughly to the approximate size, they don't have to be neat. Trimming off the excess paper makes it easier to arrange the templates on the card.
- If you are working with reclaimed card unfold your boxes so that you have flat sheets to work with, then glue the templates to the card. When you assemble these gloves, your templates will be on the inside faces of the gloves. A good quality glue stick is cheap and works well for this. Make sure that the templates are well bonded to the card.

### 3. Cutting

#### Untabbed Cutting

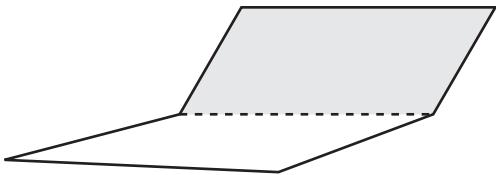

Cut around the outside or each part. As you will be taping the edges together, you will not need the grey tabs so they can be cut off at this point. The direction of the fold line on the tabs are not important as these are the edges that you will be taping together.

#### Tabbed Cutting

As you will be using the grey tabs to assemble the gloves make sure to only cut along the solid outlines.

- The fold lines on the templates are marked as either a dashed line representing a valley fold or dashes with dots to represent a mountain fold. This is with the templates on the inside of the gloves.

Dashed line represents a valley fold

- Score all of the folds marked on templates with something blunt like an old ball point pen. Scoring weakens the card along the fold lines and helps to keep your folds neat. Score and fold all of your parts.

Dashed line with dots represents a mountain fold

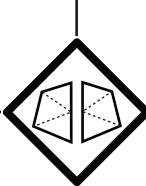

## WINTERCROFT

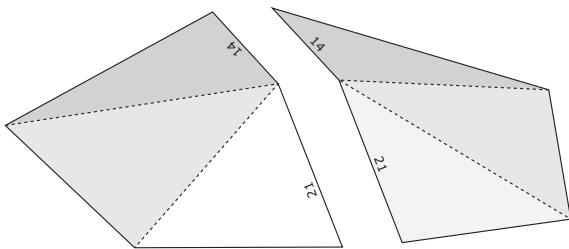

5. Starting with the parts labelled (A) and (B) find two edges with corresponding numbers.

For example edge number 14 joins to edge number 14. The numbers do not need to be completed sequentially. Then follow either the tabbed or untabbed instructions below.

### Assembly

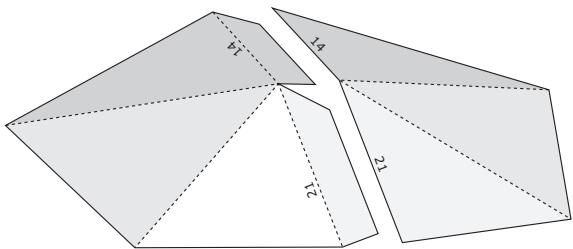

### Untabbed Construction

Having found two edges with matching numbers, hold the edges together and apply tape along the join. Taping on the outside makes things easier for most parts but if you come to a part that is difficult to tape outside, try taping inside the gloves. If a join feels like it is under stress, tape it inside and out to reinforce it.

Tape one edge at a time, test fitting each part before applying the tape. I've labelled the first few parts to get you started, from there continue matching the corresponding numbers to complete the gloves.

### Tabbed Construction

In each pair of numbered edges one part will have a gluing tab and one will not. The gluing tab will always go on the inside of the gloves.

Test fit the part before you apply glue to the tab. I recommend using a glue stick or double sided tape. Once you are happy with how the parts fit together, apply glue to the outer surface of the tab and bring the two edges together remembering that the tab goes inside the gloves.

Apply pressure to the join until the glue has set enough to hold on its own. Glue one tab at a time, test fitting each part before applying the glue. I've labelled the first few parts to get you started, from there continue matching the corresponding numbers to complete the gloves.

## Moving Parts

Once you have finished joining all of the edges, join the moving parts together using split pin paper fasteners.

1. The hinged pieces have circles marked on them. These are the centre of the pivot point for each of the articulated parts. Begin by reinforcing the material around where you will make the hole. The easiest way to do this is by applying a piece of tape to the reverse/inside of the part over the point where you will make the hole.
2. Using a piece of play dough to rest on, pierce the centre of each circle with an old ball point pen.

Split pin paper fastener

3. Always keep the tabs of the finger outside of the tabs on the hand. Start with the finger and push the paper fastener through the centre of the circle. Line this hole up with the one that you made in the hand and push the fastener through the centre of the next circle. Open up the fastener on the inside by folding the pins back flat to secure the parts in place. You can apply a piece of tape over the open split pin on the inside of the gloves for added security. Continue in this way until all of your parts are joined.

## WINTERCROFT

You can paint or decorate these gloves in any way that you like.  
Have a look at our website or Facebook page for inspiration.

Tag your photos with the hashtag **#wintercroft**  
to share them with our community.

If you run in to any problems or have any questions  
please check the frequently asked questions on:

If you still can't find the answer to your questions, then please  
send me a message to the address in the contacts below.

### Please Note

These designs are protected by  
copyright law and are intended for your  
own personal use only. Please use this  
file to make as many gloves as you like  
for yourself but please don't share or  
steal the templates, there was a lot of  
work involved in creating them. If you  
want to use them for any other reason  
then please get in touch. Selling items  
made from our templates is prohibited.

**THESE MASKS ARE A PERSONAL  
CRAFT PROJECT, PLEASE DO NOT  
USE THEM FOR PROFIT.**

### Contact Us

I would love to see your finished  
creations, please share them on  
our Facebook page:

## Scale Guideline

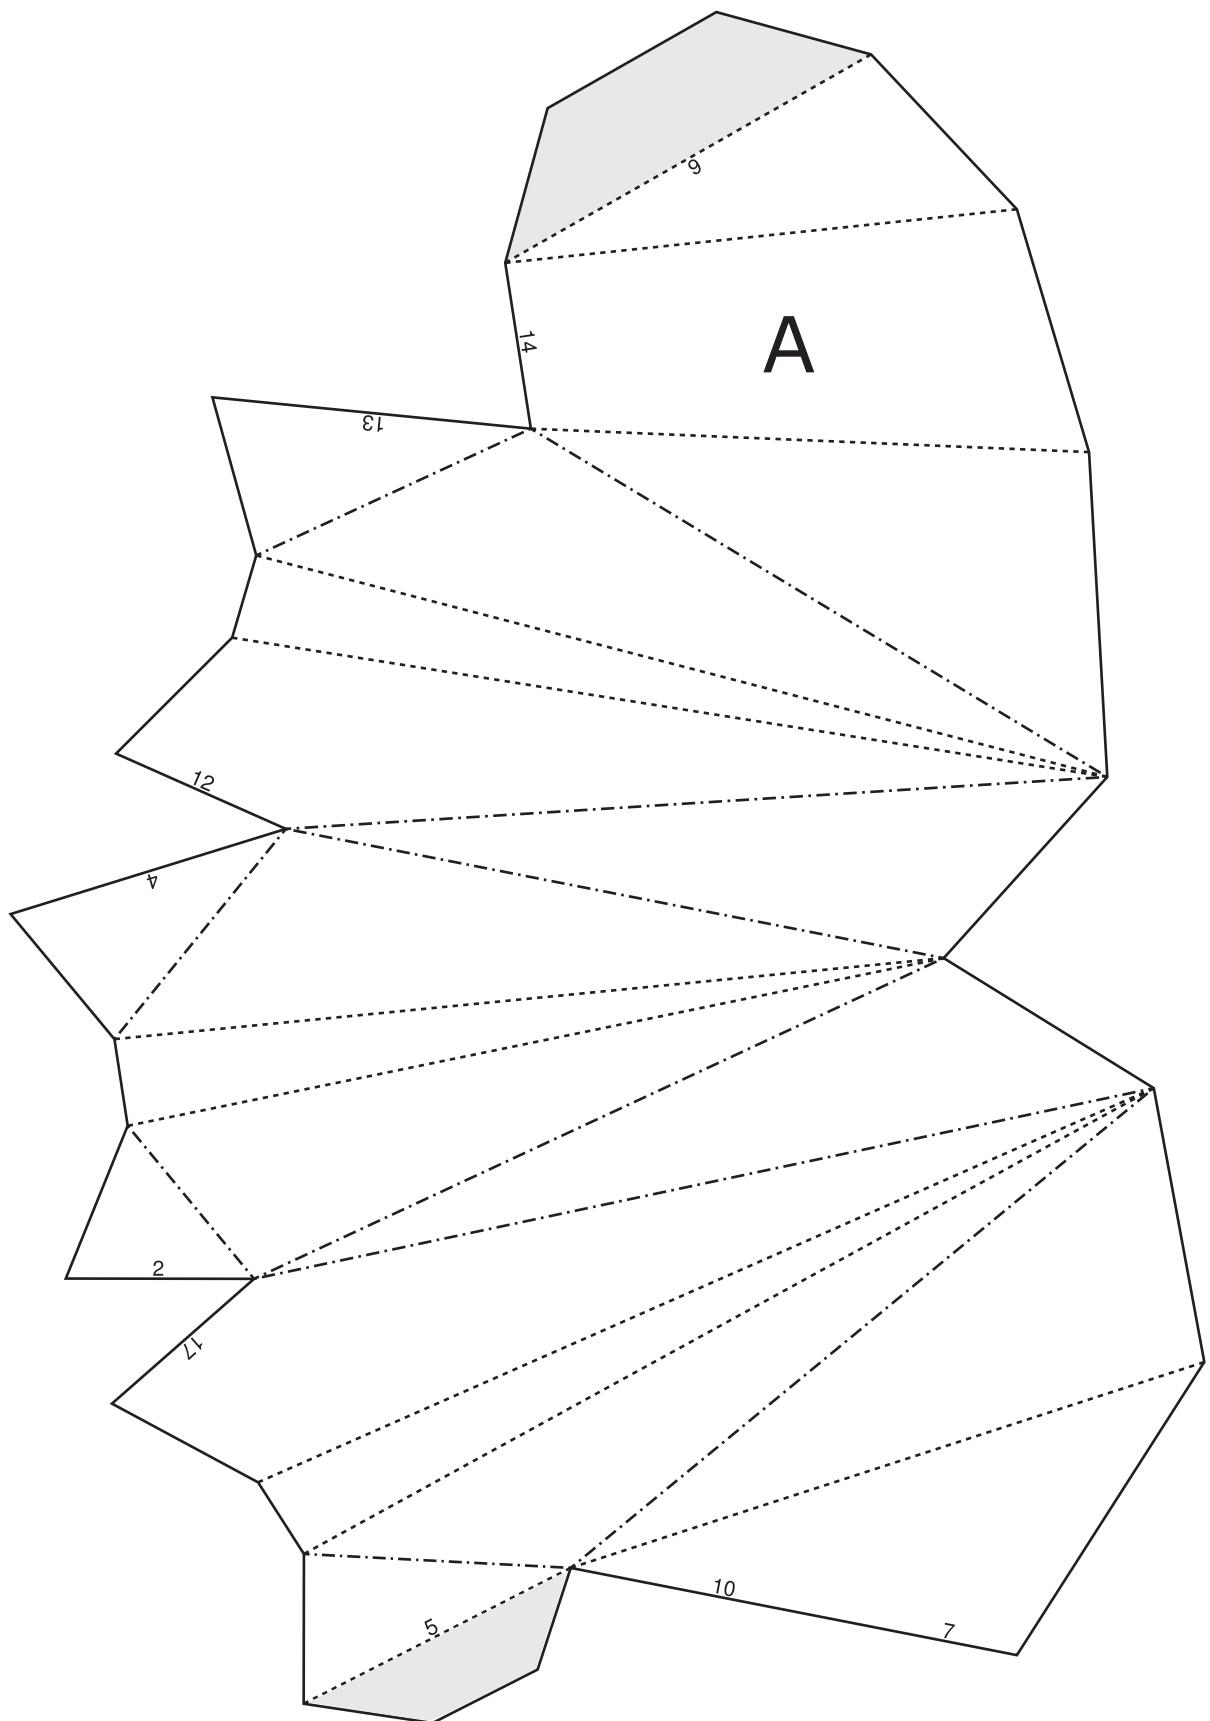

To check the scale is correct, the line below should be 150mm from end to end.
